- Full year FY14 EBIT margin is expected to be above 20%, absent major adverse external factors

Asia Pacific Fibre Cement

- In Australia, approvals for detached homes continues to increase, however the repair and remodel market continues to decline. Thus, business is expected to track in line with any growth in the detached housing market, and be impacted by positive/negative movements in the repair and remodel market
- In New Zealand, the housing market continues to improve, particularly in the Auckland and Christchurch areas

- Management expects full year earnings excluding asbestos, asset impairments, ASIC expenses, New Zealand product liability and tax adjustments to be between US\$190 million and US\$200 million
- Guidance is dependent on, among other things, housing industry conditions in the US continuing to improve and an average exchange rate of approximately US\$0.89/A\$1.00 applies for the balance of the year ending 31 March 2014
- Although US housing activity has been improving for some time, market conditions remain somewhat uncertain and some input costs remain volatile
- Management is unable to forecast the comparable US GAAP financial measure due to uncertainty regarding the impact of actuarial estimates on asbestos-related assets and liabilities in future periods

¹ Analysts' forecasts as of 10 February 2014
